Nizar Haydar

● Address: **Lebanon** - Beirut , **Egypt** - New Cairo ● nizarhaydar92@gmail.com 0096176779938 - 00201068059682 ● LinkedIn: nizar-haydar

A well-disciplined Computer and Communication Engineer, with more than 7 years of experience in supporting card management systems as a software developer. Highly experienced in the analysis, design, development, testing and implementation of bank reconciliation solutions.

PROFESSIONAL EXPERIENCE

May 2021- Present Senior Software developer **MDSL Offshore (an ITG Company) - Egypt**

- **Designed and implemented WSDL-based SOAP Web Services**, ensuring seamless integration and communication between applications, which enhanced system functionality and user experience.
- **Led the development, testing, and debugging processes for change requests and bugs in the Card Management System Application XCS**, utilizing Java, JSP, and Oracle Database. This involved collaborating with cross-functional teams to gather requirements, optimize code performance, and deliver high-quality solutions in a timely manner.
- **Provide a continuous integration/continuous deployment** (CI/CD).
- Responsible for developing and implementing Volpay projects (**VolPay** 3x and **Volante** Designer).
- **Demonstrated leadership skills by assigning tasks to team members**, monitoring their progress, and providing guidance, fostering a collaborative team environment that improved overall project efficiency and productivity.

Feb 2021- May 2021 Web Application developer **GLR Technologies LLC – USA, New York Remotely**

- Led the design and development of the **ProcessFlow Application** using Python and PostgreSQL, ensuring efficient code structure and high performance.
- Designed and executed comprehensive database scripts for creating tables, indexes, functions, and sequences to optimize data storage and retrieval.
- Planned and designed the architecture and user interface of web pages, enhancing user experience and interactivity.
- Supervised software workflow management utilizing project management tools (e.g., GitHub), facilitating collaboration, version control, and seamless project execution.

ProcessFlow Application – Project Business Scope:

The ProcessFlow Application is a distributed process scheduler. A group of tasks, called Process, defines a number of Tasks with a dependency structure. Each Process has a run frequency and one or more run times per day. Tasks are executed through Celery on a pool of workers.

Jan 2019- Dec 2020 Web Application Developer **eMcREY – Bank Muscat, Oman**

- **Responsible for the design, development, implementation of Merchant Portal Application** using HTML, CSS, AngularJS, Java, and Oracle (Database) and deployment on the bank server.
- Led the enhancement of **Cortex Merchant Application** by implementing new features and streamlining processes to meet evolving business needs.
- Design, develop, implement and maintain appropriate solutions for online banking (Card management system).
- **Provide a continuous integration/continuous deployment** (CI/CD).
- Conducted comprehensive testing of products to ensure functionality, identify errors, and optimize performance, employing diagnostic tests and troubleshooting techniques to enhance system reliability.
- Determine and resolve logged errors while ensuring system security and encryption.
- **Implement java processes**.
- Responsible for designing and implementing Web Services (WSDL).
- Settlement, reconciliation and dispute management solutions: Rationalize and modernize back-office processes to increase efficiency and reduce operational costs.
- Enterprise fraud detection and prevention solutions.

eMcREY – SABB, Riyadh

- Participate in projects and applications final stage's support.
- Coordinates the preparation of the technical scope of the Merchant Portal Application.

Merchant Portal Application – Project Business Scope:

The Portal Application Management Module solution consists of the POS & Merchant management system and it includes the processes required to settle with the merchants as well as the POS

inventory management. The merchant management module provides a web based configuration manager (Portal Application) that allows a system administrator to define entities in the system, and generate appropriate reports and enough audit trails to ensure all actions are fully secured and traceable.

2018-2019 Computer Operator – Technical Consultant (Internship) Ogero – Lebanon

- Operate and maintain computer hardware systems.
- Assist programmers and systems analysts test and debug new programs.

EDUCATION

2011-2017 M1 in Computer and Communication Engineering
Notre Dame University- Lebanon
Fully and officially accredited by ABET – NECHE.

Project title: Designing and manufacturing of a high efficiency Smart Alcohol Detector (SAD). The SAD Smartphone Application, designed using the Arduino program, tests the user's ability to drive by calculating his Blood Alcohol Concentration. The application blocks the car engine in case the driver is deemed unfit to drive, and only unblocks it following the calculated time needed for the user to become sober (according to his age, sex, weight).

2010 Baccalaureate in General Sciences
Lycée Saint Pierre- Lebanon

KEY SKILLS AND COMPETENCIES

Technical skills:

- Skilled in **VolPay 3x** and Professional in **Volante** Designer **software applications.**
- Experienced in relational databases and SQL desirables.
- Competent in Security Systems (Firewalls), Communication Systems (Arduino), Instrumentation software (LabVIEW), Antennas software (Ansys, HFSS), Technical Computing software (MATLAB), Design software (Proteus).
- Knowledgeable in C++ and C# object-oriented, general purpose programming languages.
- Expert in front-end and back-end architecture, principles and design.
- Expert in Spring MVC, Angular8.0, AngularJS, Python, Oracle, HTML, PHP, JSP.
- Proficient in Bootstrap (CSS), IBM WebSphere, **Java**, **JavaScript**.
- Competent in Jasper Soft, STS, Eclipse.
- Skilled in Microsoft Windows and Linux, Apache Tomcat.
- Skilled in Office tools: Excel, Word, PowerPoint.
- Skilled in Python, PostgreSQL.
- Skilled in Pycharm and pgAdmin.

Team working skills:

- Demonstrated strong commitment to fostering a collaborative team environment, leveraging my expertise while effectively following leadership directives when appropriate, to drive successful project outcomes.
- Adaptable and enthusiastic team player with a proven ability to excel both in a collaborative

setting and independently, as evidenced by diverse contributions to various projects and roles throughout my career.

Autonomy and problem-solving skills:

- Dynamic, results-oriented problem-solver that combines attention to details, patience, determination and persistence to identify the different aspects of a problem, evaluate options and generate solutions.

Flexibility and adaptability skills:

- Fast learner, able to adapt to new situations and duties, as demonstrated by my work in different disciplines, environments and countries.
- Capable of taking new responsibilities and shifting my schedule and focus to accommodate the needs of time-sensitive projects.

Organization and working under pressure skills:

- Demonstrates exceptional adaptability and resilience in high-pressure environments, effectively shifting priorities and maintaining focus on critical tasks to ensure timely completion of objectives.
- Proficient in managing multiple projects simultaneously, utilizing strong organizational and time-management skills to consistently deliver outstanding results while meeting stringent deadlines.

TRAININGS

- **VolPay 3x and Volante Designer training** (June – August 2021 and October 2021).
- **Native Android Application Development training** (November 2021).
- **Robots training** (January 2022).

LANGUAGES

Arabic: Native language.
English: Fluent (speaking, reading, writing).
French: Intermediate (speaking, reading, writing).
